

POWER LIFT®

POWERFUL IDEAS FOR POWERFUL RESULTS

COMBO PULLEY UNIT

The Power Lift Combo Pulley Unit - (Seated Lat Pull/Low Row) is a space-saving pulley station that is available as a free-standing unit, wall mounted, or it can be mounted to racks/connecting braces. Our simple design makes it so no adjustments are needed to move from high pulley movements to low pulley movements. The 300 lb weight stack ensures enough resistance for any movements and the unique cable routing ensures a 1:1 resistance ratio regardless of which pulley is being used. Adjustable thigh roller pad holds the user in place, while low pulley foot supports are removable for doing standing low rows, bicep curls and other movements.

KEY FEATURES:

- 300 lb. weight stack features 10 lb. increments with a 5 lb. add on weight. Weight stacks are fully machined steel weight stacks with a powder coat finish.
- 3/16" jacketed to 1/4" Military Grade cables are used on all equipment
- 1" solid chrome guide rods
- 7/16" diameter weight selector pin locks in place and is connected to weight stack to prevent loss
- Rubber bumpers under each weight stack to reduce vibration
- Top weight plate with free floating bushings for smooth operation
- Steel weight stack guards
- Adjustable thigh roller pads and removable foot supports
- Components are mig .035 welded in jig fixtures ensuring consistent fabrication and tubes have welded on caps
- Standard handles include a 48" Lat pulldown and a low row bar, additional handles are also available

Overall Dimensions:

96" (H) x 41 11/16" (W) x 66" (D)
785 lbs. (Approximate Weight)

Warranty:

Lifetime conditional warranty on frame components. Five years on rotary bearings, guide rods, pulleys and weight plates. One year on belts, cables and grips. Ninety days on upholstery and items not specified.
